Adhesives and Sealants

Instant Gasket

Pressurized Power can

1. Description

The Instant Gasket Power-Can holds a **high temperature Universal Sealant**. It is a rapid curing one-part silicone sealant, excellent applicable as bonding and sealing material. This ready to use product reacts with the environmental humidity to a high elastic coutchuc with excellent adhesion on glass, glazed surfaces, plastics, wood, aluminum and a wide range of other materials.

This low volatile acetoxo-based silicone formula will not contaminate oxygen sensors, has excellent temperature and pressure resistance and resists common automotive fluids. The special Power-Can 2 chamber dispensing system is especially cost effective. The use of the threaded tapered nozzle attachment increases total coverage compared to that of a 310g cartridge. Propellant non flammable gas.

2. Benefits

Geared towards the professional mechanic Instant Gasket replaces cartridges and squeeze tubes in ease of dispensing a uniform bead of sealant exactly where you want it. A better sealing gasket with no voids, gaps or air passages can be achieved with the press of just one finger.

- Multi purpose product
- Outstanding resistance to weathering, UV, from -40° to $+250(300)^{\circ}\text{C}$
- Rapid curing
- Fast and easy to use, one hand point & dispense
- Working without additional tools
- Greater yield per package

3. Application

This product is excellently suitable for sealing of joints which are exposed to strain by high temperatures. The surface to adhere on, must be clean and dry.

4. Technical Data:

Curing system:	Acetate (acetic acid)	Shore A-Hardness:	app. 26
Tack-free time	app. 10 minutes	Tensile strength	1,5 N/mm ²
Temperature range	- 50° to + 250(310) °C	Recovery:	> 90 %
Curing time:	3 mm / 24 h	Elongation at break:	Ca. 300 %
Spec. weight:	1,05	Shelf life	app 24 months at room temp.
